Akash Biradar

9380727701 | akashbiradar0909@gmail.com | Kalaburagi, Karnataka

Summary

Full Stack Developer with experience building web applications, REST APIs, and data-driven platforms using React, React Native, Node.js, Express.js, MongoDB, and Python. Experienced in frontend development, backend API development, third-party integrations, authentication, data automation, and web scraping. Currently working on web and mobile applications for an AI-powered healthcare and telemedicine platform.

Skills

Frontend:
HTML, CSS, JavaScript, React.js, React Native, TypeScript, Responsive UI Design

Backend:
Node.js, Express.js, REST APIs, JWT Authentication

Database:
MongoDB, Mongoose, SQL, PL/SQL

Data & Automation:
Python, Web Scraping, BeautifulSoup, Selenium, Scrapy, Pandas

Analytics & Integrations:
Google Analytics 4 (GA4), Event/Button Tracking, Funnel Creation, Shopify, Klaviyo, GraphQL

Tools & Platforms:
Git, Postman, Netlify, Redis

Work Experience

MindsNXT | Kalaburagi,Karnataka
Software Engineer | 02/2025 - 03/2026
Onsite

Shopify E-commerce | Data & Integration | 12/2025 – 03/2026

- Worked on Shopify, Klaviyo, and GA4 third-party integrations using APIs and GraphQL.
- Managed customer, order, and marketing data synchronization.
- Supported analytics reporting and scheduled data workflows.
- Improved data accuracy using validation, logging, and monitoring.

Sigmatic – Healthcare AI-Powered Analytics Platform | Backend Engineer | 06/2025 – 11/2025

- Worked on backend development for a healthcare-focused AI analytics platform.
- Developed and maintained REST APIs for user management, dashboards, and data access.
- Integrated MongoDB with Mongoose and optimized queries for handling analytical data.
- Implemented authentication and role-based access for secure system usage.
- Supported data retrieval features such as filtering, pagination, and sorting.
- Worked closely with frontend and data teams to ensure smooth API and data integration.
- Tested APIs using Postman and fixed performance and stability issues.

Genesilico – Bioinformatics AI Platform | Data Automation & Scraping | 12/2024 – 05/2025

- Built and deployed end-to-end scraping pipelines using BeautifulSoup, Selenium, and Scrapy.
- Scraped US Government websites, e-commerce sites, and medical data portals, handling dynamic content, logins, and anti-bot measures.
- Implemented solutions to handle website restrictions such as CAPTCHAs and dynamic content.
- Cleaned, stored, and organized scraped datasets in JSON, CSV, and Excel using Python and Pandas.
- Collaborated with ML teams by supplying large annotated datasets for model training and testing.

TheStackly | Hyderabad,Telangana
MERN Stack Developer | 06/2026 - Present
Remote

- Developing responsive web interfaces using React.js for an AI-powered healthcare and telemedicine platform.
- Building mobile application features using React Native and TypeScript.
- Working across both web and mobile applications to implement and improve product features.
- Contributing to an AI-driven healthcare platform focused on digital patient and clinical workflows.

Startup Experience

Founder & Full Stack Developer – ServiQe
2026 – Present

ServiQe.com

- Founded and developed a service marketplace platform connecting customers with skilled professionals.
- Designed the complete UI/UX and independently built the frontend, backend, and database architecture.
- Developed REST APIs, authentication, worker onboarding, and service management features.
- Managed deployment, analytics, SEO, branding, and product strategy.
- Built and maintained the platform from concept to production as a solo developer.

Internship Experience

Ethnotech – Python Intern

- Worked on data processing and cleaning using
- Pandas.Processed text data using tokenization and parsing.

Project

Stress Detection using ML *(Jun 2023 – May 2024)*

- Built a stress classification model using behavioral and physiological data.
- Applied pre-trained ML models and libraries like Scikit-learn, Pandas, and NumPy.

Interior Design Portfolio Website
project link

- Designed and developed a responsive portfolio website for an interior design business.
- Implemented modern UI components and mobile-friendly layouts.
- Optimized performance and deployed using Netlify.

Film Production Portfolio Website
project link

- Built a creative portfolio website for a film production brand.
- Implemented portfolio galleries, service sections, and responsive layouts.
- Focused on clean UI/UX design and smooth navigation.

Education

P D A college of engineering
Information Science | 06/2024

Certificates

NPTEL IIT Kharagpur, AWS , Edureka full stack, Ethnotech

Languages

Kannada, Hindi, English, Telugu
